Key Word Index to Volume 14 (1991)

α_2-Adrenoceptors
- Diabetes mellitus; Renal function; Hyperfiltration, 197

Adverse drug reactions
- Hypoglycemia; Glyburide, 139

Affinity chromatography
- Glycosylated hemoglobin; Ion-exchange chromatography, 75

Aldose reductase
- Diabetes; Diabetic complications; Enzyme activation; Erythrocyte; Non-enzymic glycation, 9

Aldose reductase inhibitor
- Polyol pathway; ONO-2235; Retina; Erythrocyte, 29

Aldose reductase inhibition
- Diabetic neuropathy; Nerve conduction; Sensory threshold; Autonomic function, 63

Asian
- Diabetes mellitus; Complications; Caucasian; Ischaemic heart disease; Peripheral vascular disease; Diabetic retinopathy; Diabetic renal disease; Migration, 205

Atrial natriuretic factor
- Volume expansion; Diuresis; Natriuresis, 37

Autoimmunity
- Islet cell antibodies; Islet cell antigens; Fetal islets, 1

Autonomic function
- Aldose reductase inhibition; Diabetic neuropathy; Nerve conduction; Sensory threshold, 63

BB/W-rats
- Insulin-like growth factor-I; Retina, 91

Carnitine
- Insulin; NIDDM; Insulin-resistance, 191

Castration
- Diabetes; Kidney; Insulin-like growth factor I, 15

Caucasian
- Diabetes mellitus; Complications; Asian; Ischaemic heart disease; Peripheral vascular disease; Diabetic retinopathy; Diabetic renal disease; Migration, 205

β Cell transplantation
- Streptozotocin induced diabetes; Insulin-dependent diabetes mellitus; Cell therapy; Rat, 157

Cell therapy
- β cell transplantation; Streptozotocin induced diabetes; Insulin-dependent diabetes mellitus; Rat, 157

Complications
- Diabetes mellitus; Asian; Caucasian; Ischaemic heart disease; Peripheral vascular disease; Diabetic retinopathy; Diabetic renal disease; Migration, 205

Diabetes
- Aldose reductase; Diabetic complications; Enzyme activation; Erythrocyte; Non-enzymic glycation, 9

Diabetes
- Castration; Kidney; Insulin-like growth factor I, 15

Diabetes
- Plasma urate; Glucose disposal; Retinopathy; Proteinuria, 99

Diabetes mellitus
- Platelet; Thrombin; Inositol phosphate, 21

Diabetes mellitus
- Insulin dependency; Ketone bodies; Glucagon stimulation test, 107

Diabetes mellitus
- Treatment; Education; Mathematical model; Physiology, 113

Diabetes mellitus
- Glucose; Insulin; Fruit, 123

Diabetes mellitus
- Impaired glucose tolerance; Risk factor; Ischaemic stroke; Haemorrhagic stroke, 133

Diabetes mellitus
- Renal function; α_2-Adrenoceptors; Hyperfiltration, 197

Diabetes mellitus
- Complications; Asian; Caucasian; Ischaemic heart disease; Peripheral vascular disease; Diabetic retinopathy; Diabetic renal disease; Migration, 205

Diabetic complications
- Aldose reductase; Diabetes; Enzyme activation; Erythrocyte; Non-enzymic glycation, 9

Diabetic neuropathy
- Aldose reductase inhibition; Nerve conduction; Sensory threshold; Autonomic function, 63

Diabetic retinopathy

– Diabetes mellitus; Complications; Asian; Caucasian; Ischaemic heart disease; Peripheral vascular disease; Diabetic renal disease; Migration; 205
Diabetic renal disease
– Diabetes mellitus; Complications; Asian; Caucasian; Ischaemic heart disease; Peripheral vascular disease; Diabetic retinopathy; Migration, 205
Diuresis
– Volume expansion; Atrial natriuretic factor; Natriuresis, 37

Education
– Diabetes mellitus; Treatment; Mathematical model; Physiology, 113
Enzyme activation
– Aldose reductase; Diabetes; Diabetic complications; Erythrocyte; Non-enzymic glycation, 9
Epidemiology
– Insulin-dependent diabetes mellitus; Etiology; Familial; Sporadic, 183
Erythrocyte
– Aldose reductase; Diabetes; Diabetic complications; Enzyme activation; Non-enzymic glycation, 9
Erythrocyte
– Polyol pathway; Aldose reductase inhibitor; ONO-2235; Retina, 29
Etiology
– Insulin-dependent diabetes mellitus; Epidemiology; Familial; Sporadic, 183
Euglycemic insulin clamp
– Hypertriglyceridemia; Insulin resistance, 55

Familial
– Insulin-dependent diabetes mellitus; Etiology; Epidemiology; Sporadic, 183
Fetal islets
– Islet cell antibodies; Islet cell antigens; Autoimmunity, 1
Fruit
– Glucose; Insulin; Diabetes mellitus, 123

Glucagon stimulation test
– Diabetes mellitus; Insulin dependency; Ketone bodies, 107
Glucose
– Insulin; Fruit; Diabetes mellitus, 123
Glucose disposal
– Diabetes; Plasma urate; Retinopathy; Proteinuria, 99
Glyburide
– Hypoglycemia; Adverse drug reactions, 139
Glycosylated hemoglobin
– Ion-exchange chromatography; Affinity chromatography, 75

Haemorrhagic stroke
– Diabetes mellitus; Impaired glucose tolerance; Risk factor; Ischaemic stroke, 133
Hyperfiltration
– Diabetes mellitus; Renal function; α_2-Adrenoceptors, 197
Hyperglycemia
– Urinary C-peptide; Urinary β_2-microglobulin; Urinary *N*-acetyl-D-glucosaminidase; Urinary albumin, 85
Hypertriglyceridemia
- Insulin resistance; Euglycemic insulin clamp, 55
Hypoglycemia
– Adverse drug reactions; Glyburide, 139

Impaired glucose tolerance
– Diabetes mellitus; Risk factor; Ischaemic stroke; Haemorrhagic stroke, 133
Inositol phosphate
– Platelet; Thrombin; Diabetes mellitus, 21
Insulin
– Glucose; Fruit; Diabetes mellitus, 123
Insulin
– Carnitine; NIDDM; Insulin-resistance, 191
Insulin dependency
– Diabetes mellitus; Ketone bodies; Glucagon stimulation test, 107
Insulin resistance
- Hypertriglyceridemia; Euglycemic insulin clamp, 55
Insulin secretion
– Serum C-peptide; Urinary C-peptide; Urinary C-peptide clearance; Non-insulin-dependent diabetes mellitus, 165
Insulin treatment
– Somatostatin; Octreotide; Type 2 diabetes; Obesity, 47
Insulin-dependent diabetes mellitus
– β cell transplantation; Streptozotocin induced diabetes; Cell therapy; Rat, 157
Insulin-dependent diabetes mellitus
– Etiology; Epidemiology; Familial; Sporadic, 183
Insulin-like growth factor I
– Castration; Diabetes; Kidney, 15
Insulin-like growth factor-I
– Retina; BB/W-rats, 91
Insulin-resistance
– Carnitine; Insulin; NIDDM, 191
Ion-exchange chromatography
– Glycosylated hemoglobin; Affinity chromatography, 75
Ischaemic stroke
– Diabetes mellitus; Impaired glucose tolerance; Risk-factor; Haemorrhagic stroke, 133
Ischaemic heart disease
– Diabetes mellitus; Complications; Asian; Caucasian; Peripheral vascular disease; Diabetic retinopathy; Diabetic renal disease; Migration, 205

Islet cell antibodies
– Islet cell antigens; Fetal islets; Autoimmunity, 1
Islet cell antigens
– Islet cell antibodies; Fetal islets; Autoimmunity, 1

Ketone bodies
– Diabetes mellitus; Insulin dependency; Glucagon stimulation test, 107
Kidney
– Diabetes mellitus; Insulin dependency; Glucagon stimulation test, 107
Kidney
– Castration; Diabetes; Insulin-like growth factor I, 15

Lipoproteins
– Vitamin E; α-Tocopherol; Non-insulin-dependent diabetes mellitus, 175

Mathematical model
– Diabetes mellitus; Treatment; Education; Physiology, 113

Migration
– Diabetes mellitus; Complications; Asian, Caucasian; Ischaemic heart disease; Peripheral vascular disease; Diabetic retinopathy; Diabetic renal disease, 205

NIDDM
– Carnitine; Insulin; Insulin-resistance, 191
Natriuresis
– Volume expansion; Atrial natriuretic factor; Diuresis, 37
Nerve conduction
- Aldose reductase inhibition; Diabetic neuropathy; Sensory threshold; Autonomic function, 63
Non-enzymic glycation
– Aldose reductase; Diabetes; Diabetic complications; Enzyme activation; Erythrocyte, 9
Non-insulin-dependent diabetes mellitus
– Serum C-peptide; Urinary C-peptide; Urinary C-peptide clearance; Insulin secretion, 165
Non-insulin-dependent diabetes mellitus
– Vitamin E; α-Tocopherol; Lipoproteins, 175

ONO-2235
– Polyol pathway; Aldose reductase inhibitor; Retina; Erythrocyte, 29
Obesity
– Somatostatin; Octreotide; Type 2 diabetes; Insulin treatment, 47
Octreotide
– Somatostatin; Type 2 diabetes; Insulin treatment; Obesity, 47

Peripheral vascular disease
– Diabetes mellitus; Complications; Asian; Caucasian; Ischaemic heart disease; Diabetic retinopathy; Diabetic renal disease; Migration, 205
Physiology
– Diabetes mellitus; Treatment; Education; Mathematical model, 113
Plasma urate
–Diabetes; Glucose disposal; Retinopathy; Proteinuria, 99
Platelet
– Thrombin; Inositol phosphate; Diabetes mellitus, 21
Polyol pathway
– Aldose reductase inhibitor; ONO-2235; Retina; Erythrocyte, 29
Proteinuria
– Diabetes; Plasma urate; Glucose disposal; Retinopathy, 99

Rat
–β cell transplantation; Streptozotocin induced diabetes; Insulin-dependent diabetes mellitus; Cell therapy, 157
Renal function
– Diabetes mellitus; α_2-Adrenoceptors; Hyperfiltration, 197
Retina
– Polyol pathway; Aldose reductase inhibitor; ONO-2235; Erythrocyte, 29
Retina
– Insulin-like growth factor-I; BB/W rats, 91
Retinopathy
– Diabetes; Plasma urate; Glucose disposal; Proteinuria, 99
Risk factor
– Diabetes mellitus; Impaired glucose tolerance; Ischaemic stroke; Haemorrhagic stroke, 133

Sensory threshold
– Aldose reductase inhibition; Diabetic neuropathy; Nerve conduction; Autonomic function, 63
Serum C-peptide
– Urinary C-peptide; Urinary C-peptide clearance; Insulin secretion; Non-insulin-dependent diabetes mellitus, 165
Somatostatin
– Octreotide; Type 2 diabetes; Insulin treatment; Obesity, 47
Sporadic
– Insulin-dependent diabetes mellitus; Etiology; Epidemiology; Familial, 183
Streptozotocin induced diabetes
– β cell transplantation; Insulin-dependent diabetes mellitus; Cell therapy; Rat, 157

Thrombin
– Platelet; Inositol phosphate; Diabetes mellitus, 21

α-Tocopherol
– Vitamin E; Lipoproteins; Non-insulin-dependent diabetes mellitus, 175
Treatment
– Diabetes mellitus; Education; Mathematical model; Physiology, 113
Type 2 diabetes
– Somatostatin; Octreotide; Insulin treatment; Obesity, 47

Urinary β_2-microglobulin
– Urinary C-peptide; Urinary *N*-acetyl-β-D-glucosaminidase; Urinary albumin; Hyperglycemia, 85
Urinary C-peptide
– Urinary β_2-microglobulin; Urinary *N*-acetyl-β-D-glucosaminidase; Urinary albumin; Hyperglycemia, 85
Urinary C-peptide
– Serum C-peptide; Urinary C-peptide clearance; Insulin secretion; Non-insulin-dependent diabetes mellitus, 165
Urinary C-peptide clearance
– Serum C-peptide; Urinary C-peptide; Insulin secretion; Non-insulin-dependent diabetes mellitus, 165
Urinary *N*-acetyl-β-D-glucosaminidase
– Urinary C-peptide; Urinary β_2-microglobulin; Urinary albumin; Hyperglycemia, 85
Urinary albumin
– Urinary C-peptide; Urinary β_2-microglobulin; Urinary *N*-acetyl-β-D-glucosaminidase; Hyperglycemia; 85
Vitamin E
– α-Tocopherol; Lipoproteins; Non-insulin-dependent diabetes mellitus, 175
Volume expansion
– Atrial natriuretic factor; Diuresis; Natriuresis, 37
